

Immun select Dr. Wolz

For healthy
immune defence!¹⁾

With five selected
substances

Dear customers,

our immune system is beset by diverse challenges day in day out.

It is particularly encumbered by the cold season, stress, sports activities and environmental impacts. The better our body's immune defence works, the better we can ward off external attacks.

The key to this is healthy and balanced nutrition with vitamins, minerals and other bioactive substances. Based on the results of extensive studies we have combined five specific micronutrients in Immun select to effectively gear your diet towards a healthy immune system.

Dr. med. Dipl.-Ing. Georg Wolz

Immun select Dr. Wolz

- ✓ **For immune system and cell protection^{1), 2)}**
- ✓ **With five selected substances**
- ✓ **Also ideal when travelling**

Innovative selection for your immune system

The immune capsule Immun select Dr. Wolz contains an innovative combination of micronutrients in which key immune substances¹⁾ and antioxidants²⁾ as well as vitamin C (from acerola cherries) and organically bound zinc are combined into a natural immunoactive complex¹⁾ with the bioactive substance beta-1,3/1,6-glucan from the wall of yeast cells, the lactic acid bacterium *Lactobacillus paracasei* MCC1849 and the phytochemical quercetin.

Immun select is useful to people who want to support their body's immune defence¹⁾, athletes who want to maintain their immune system during phases of training³⁾, and people suffering from fatigue and exhaustion.⁴⁾

Valuable ingredients

1.) (1->3),(1->6)-beta-D-glucans

Beta glucans are very valuable long-chain dietary fibres (natural polysaccharides). They are obtained from the cell walls of the smallest fungus in the world. Only (1->3), (1->6)-beta-D-glucans meet the necessary requirements for Immun select.

2.) **Lactobacillus paracasei**

Lactobacillus paracasei MCC1849, the strain of lactic acid bacteria used in Immune select Dr. Wolz, was selected from thousands because under comparison it showed the highest potential. There are several positive (human) studies relating to it.

3.) **Quercetin**

The phytochemical quercetin is a natural yellow dye from the polyphenols group. Quercetin is to be found in high concentrations in onions, apples and broccoli. But the majority of quercetin can be destroyed through storage and preparation (e.g. by being heated). As the valuable dye is chiefly contained in the peel, it is also lost when such fruit and vegetables are peeled. A daily dose of Immun select Dr. Wolz contains as much quercetin as one kilogram of broccoli or 500 grammes of apples.

4.) **Zinc**

The trace element zinc performs numerous functions in the body. One key function is boosting the immune system. Zinc is chiefly to be found in food of animal origin (especially oysters, offal, fish, cheese). For people on vegetarian or unbalanced diets it can be useful to take zinc supplements. Dr. Wolz uses natural zinc biologically bound in zinc yeast for Immun select.

5.) **Vitamin C from acerola**

Vitamin C is not only the best known of vitamins, it is also a bona fide multi-talent as it performs a wide range of bodily functions incl. lending support for a healthy immune system. Dr. Wolz uses vitamin C from the juice of acerola cherries for Immun select. It is therefore naturally present in all precursors and so has better bioavailability than synthetic ascorbic acid. Acerola grows in the tropical regions of Central and South America and is considered to be one of the most abundant fruit sources of vitamin C on Earth.

Dosage recommendation:

4 capsules a day with liquid at mealtimes. The capsules can be opened by pulling them apart if required. Children aged 3 years and above take half.

Gluten-free and no lactose, maltodextrin and dyes.

There are many good reasons for Dr. Wolz:

- ✓ Innovative family business with over 50 years of experience
- ✓ Global trust: Customers place their faith in Dr. Wolz in over 35 countries.
- ✓ Up-to-date science: We collaborate closely with leading institutes and hospitals in our own R&D.
- ✓ All production under the same roof: Every product is manufactured in our own factory in Geisenheim/the Rhinegau.
- ✓ Highest standards of quality: All our products are regularly inspected by independent laboratories.
- ✓ Our quality management is certified as conforming to ISO 9001 and HACCP.

.....
1) Vitamin C and B12 contribute to normal functioning of the immune system
2) Vitamin C and zinc help to shield cells from oxidative stress.
3) Vitamin C contributes to normal functioning of the immune system during and after intensive physical exertion.
4) Vitamin C helps to decrease fatigue and exhaustion.
